

# Laboratory Support

**Overview** MCS's depth of industry knowledge, best practice approach and proven range of services are augmented by our unique ability to find ways to help our scientific clients cut costs. Our team has been certified for OSHA and International Air Transport Association (IATA) guidelines for the safe and proper handling, storage, packing and shipment of hazardous materials (HAZMAT).

## Trained Professionals

In the manufacturing and R&D environments, count on MCS's team of highly skilled and trained professionals to handle your soft service facilities management operations safely and securely. Features and benefits of MCS's laboratory services include:

- Cleaning and sterilization of lab glass
- Managed autoclave operations
- Hazardous Packaging and Shipping
- Class 7 Radiation Handling and Shipping
- Hazardous Gas Cylinder Management
- Strict SOP Adherence
- Internal Lab Waste Collection and Log Management
- Vendor-Supplier Management and Coordination
- BBP (Blood Borne Pathogen) Hazard Awareness Training
- Material Management and Reconciliation of Lab Supplies and Solvents
- Development of SOP's for Safe Handling Practices

## Extensive Knowledge

Our extensive knowledge of Good Manufacturing Practice (GMP), drug development lifecycles, clinical trials and the FDA submission process enable organizations to take advantage of our end-to-end portfolio from laboratory assistance and equipment cleaning, to disposal of biohazardous waste materials, and finally, the packaging, transporting and shipping of sample materials.
