

Digital Forensics

Overview MCS understands the critical role that data collection and forensics plays in your litigation strategy. The collection, preservation, and analysis of digital evidence are essential to build a strong case. That's why our experienced consultants serve as your true partner, providing advice and counsel on all aspects of your electronic data acquisition requirements including:

- Development of custom data collection strategies
- Proven methodologies for forensically-sound, global connections
- Experienced collections specialists for local and remote support
- Expert witness testimony

Mobile Forensics

As our modern-day technology advances, mobile devices are becoming more important than ever in the world of digital forensics. Our experts utilize industry-leading software and equipment to properly capture the data on these devices and help you obtain the information that you need from them.

Drive / Data Wiping

When you get rid of your old machines, you want to make sure any previously stored personal information is removed before disposal. Information including financial data, passwords, personal information and more could be detrimental if in the wrong hands. Rest assured knowing that MCS has the tools you need to completely remove all of this sensitive information from your hard drive.

Data Recovery

If you accidentally delete or lose an important file, MCS has the capabilities to recover it. Our experts are trained to handle these very sensitive operations to make sure your critical data is not lost forever. Situations in which our data recovery specialists can assist you include:

- **Physical Damage**
 - If you drop or damage your hard drive, we have the tools to inspect, diagnose and repair any damages that were done.
- **Raid Recovery**
 - If your server crashes or dies, we are able to extract all of the information from it. Similarly, if the raid has become misaligned, we have the ability to put it back together.
- **Deleted Files**
 - If you accidentally deleted a file, it is possible that the file is not yet lost forever and can be recovered if you contact us immediately.
