

Trial Technology

Overview MCS Technology Solutions offers full-service litigation technology services including graphic creation, A/V equipment rental, video services and trial presentations that make your case.

Expert Consultants Our Trial Technology Consultants utilize expertise with the wide array of presentation software and techniques to provide each client with the customized services they need for depositions, settlement hearings, arbitrations or trials. Book one of our consultants today to become an extended arm of your litigation team and witness winning litigation technology first hand.

Services Offered Our case list ranges from small personal injury to complex patent or large criminal and environmental matters. From exhibit boards to "Day In The Life" or "Compulsory Medical Exam" videos to complete courtroom technology, we will provide you with an exciting and innovative presentation solution that is as dynamic as the case itself. Features of our Trial Technology services include:

- Opening Statement & Summation Presentations
- "Day in the Life" / CME Videos
- "Hot-Seat" Operators
- 24/7 War Room Support
- Custom Graphics & Animations
- Full Electronic Courtroom Set-up
- Deposition & Video Editing

Post eDiscovery MCS offers a solution, powered by LexCity, called eDepoze. eDepoze takes the paper (and the hassle) out of your witness prep by giving you, your case team, and your witnesses and clients a central place to review and collaborate on documents that a witness may need to see before testifying in an upcoming deposition, trial, arbitration or elsewhere.
