

# Medical Record Organization & Analysis

**Overview** Cases involving medical complexities require very special expertise. At MCS, that expertise is provided by physicians and/or legal nurse consultants who review, analyze and summarize all essential information contained in medical records in chronological order. Related fees are billed on an hourly basis and can be recovered as a billable expense. Features of our chronologies are:

- Critical events are highlighted
- Duplicate records are deleted and a log is created
- A report listing any missing records is generated
- Extracted medical data can be coded and presented in spreadsheet or factual summary format by whatever sorting criteria are specified
- Documents can be delivered in Word or PDF format. PDF format options include:
  - *Hyperlinks that allow for instant navigation to the respective source pages*
  - *Bookmarking allows for organization of documents by userdefined categories*
  - *Printable version with tab sheets*

**Services** Depending on your needs, our medical record analysis services can include:

- Establishing medical care date ranges, usage, dosage, quantity and duration, proximity to dates of ingestion, diagnoses, lab values, imaging studies
  - Confirmation of side effects: heart attacks, stroke, fractures, etc.
  - Seeking alternative causation by identifying other risk factors
  - Summarizing, organizing, indexing and paginating records
  - Identifying potential expert witnesses
  - Coordinating Independent Medical Examinations (IMEs)
  - Providing expert testimony
  - Identifying and applying multidisciplinary standards of care and regulatory requirements
- Free reviews of case synopsis online

**Benefits** By utilizing the knowledge and experience of our physicians and/or legal nurse consultants, MCS frees you to focus your time and resources where they will be most productive. Our areas of expertise in personal injury litigation include:

- |                           |                       |
|---------------------------|-----------------------|
| • Mass tort               | • Medical malpractice |
| • Workmen's compensation  | • Pharmaceutical      |
| • Environmental exposure  | • Asbestos            |
| • Nursing home negligence | • Medical devices     |
